DETAILED ACTION

Response to Arguments

1. Applicant's arguments presented via telephone, see Interview Summary of 9/13/06, with respect to Donnelly et al. '956 have been fully considered and are persuasive. The Final Rejection of 5/18/06 applied to claims 36-38 and 40-41 (and objection to claims 39 and 42) has been withdrawn.

Allowable Subject Matter

2. Claims 27-42 are allowed.

3. The following is an examiner's statement of reasons for allowance:

As was discussed on 9/13/06, Donnelly et al. does not include all elements as claimed. The drive member (part of clutch 42) moves along with the stretch rollers in the disengaged position. The rotating output member rotates the first and second stretch rollers via the tape pulled over their respective surfaces when in the "freewheeling" mode (when clutch is disengaged), however the drive member of the clutch rotates with the rollers. Note chain 55 is connected to clutch and therefore "freewheels" with the rotating output member of the motor as described. The prior art fails to disclose the invention as claimed. The various elements of the drive assembly and their relationship to each other for providing the dispensing and/or a stretched film are not previously disclosed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
